

## Data Sheet

### Zeolite MED<sup>®</sup> hyaluron gel

#### ZEOLITE – THE CLASSIC DETOX PRO + HYALURON AS MOISTURIZING GEL FOR NATURAL SKIN CARE

Our zeolite-hyaluron gel has been developed according to the guidelines for natural cosmetics in order to reduce water loss of the skin and at the same time to increase skin hydration. The classic detoxification specialist zeolite is supplemented with smoothing and nourishing hyaluron acid, vitamin C (ascorbic acid) and niacinamide (vitamin B3).

This moisturizing gel contains short and long chain hyaluron acid which is a natural moisturizer that smooths the skin and is intended to protect from dehydration even at low humidity.

#### CONTENTS AND PACKAGING

50 ml of zeolite hyaluron gel in a dispenser with no out packaging, manufactured according to German cosmetics regulations.

#### USE AND DOSAGE

Apply a thin layer of zeolite MED<sup>®</sup> hyaluron gel and lightly massage into the skin one to several times daily as necessary. In case of contact with eyes, rinse with plenty of water and contact a doctor if necessary.

#### EXPLANATION OF INGREDIENTS

AQUA	Water – basic raw ingredient
PENTYLENE GLYCOL	helps to inhibit the growth of microorganisms on the skin, provides moisture
XANTHAN GUM	Binder, gelling agent, plant-based, increases or reduces the viscosity of cosmetic products, firming
SODIUM HYALURONATE	Hyaluron acid - component of connective tissue whose high water-binding capacity forms a thin surface film on the skin which protects the skin from dehydration. Solutions of hyaluron acid bind extraordinarily with water through the formation of a viscoelastic network. Thus hyaluron acid is used as a moisturizer in skin care products and thereby protects the horny layer (stratum corneum) from dehydration even at low humidity. Hyaluron acid exhibits a very high water-binding capacity. Hyaluron acid or derivatives of it which are contained in cosmetic products reduce transepidermal water loss and boost skin hydration. Skin is visually smoother and more nourished.
ZEOLITE	Zeolite – active ingredient, natural mineral, binds to harmful substances, antiviral, antibacterial, anti-inflammatory
ASCORBIC ACID	Vitamin C – strengthens skin, skin-smoothing, protects against free radicals, stimulates cell renewal, strengthens connective tissue, stimulates wound healing
NIACINAMIDE	promotes blood circulation, increases vascular dilatation, aims for an even skin surface by reducing roughness and irregularities
SODIUM HYDROXIDE	mineral, stabilizes the pH value of cosmetic products
SODIUM PHYTATE	plant-based, chelating, antimicrobial
ALCOHOL	inhibits the development of microorganisms in cosmetic products

#### INGREDIENTS

Long and short chain hyaluron acid, zeolite, vitamin C, vitamin B3

#### PROPERTIES

**Hyaluron acid** smooths and firms the skin. Activated, natural **clinoptilolith-zeolite** supports regeneration through its harmful substance binding properties. **Vitamin C** (ascorbic acid) is involved in connective tissue metabolism as well as in collagen fiber formation and works as a radical inhibitor and antioxidant. **Niacinamide** (vitamin B3) is skin-smoothing, promotes blood circulation, and increases vascular dilatation.

#### STORAGE

Store in a dry place below 30°C, keep away from sunlight.

#### INGREDIENTS

AQUA, PENTYLENE GLYCOL, XANTHAN GUM, SODIUM HYALURONATE, ZEOLITE, ASCORBIC ACID, NIACINAMIDE, SODIUM HYDROXIDE, SODIUM PHYTATE, ALCOHOL
